

Oleg K.

Front End Developer

Summary of Qualifications

I am a skilled and dedicated front-end web developer with 1 year of experience in React and Next.js. I know how to work through the entire project development cycle - from architecture selection to application deployment. I can write clean and readable code. I like to work both in a team and individually.

The main technologies which I used in my previous projects were React.js and Next.js. From Node JS, I've worked with Express to create backend applications.

My most outstanding qualities are good communication, the ability to work in a team, the ability to solve problems, and the willingness to learn new things.

Skills

Programming Languages/Technologies

- JavaScript/TypeScript
- HTML/CSS/Sass
- SQL
- NodeJS
- PHP
